

# Right Way!

## **Proper Adjustment of Seat Belt**

**After snapping-in seat belt, adjust it snugly across hips. Notice the amount of excess belt pulled through to get a snug fit across the lap.**

**Hazard: Body not properly restrained during hard stop or crash causing injury or death.**

**Controls: Proper training and supervision on**

# Wrong Way!

**Driver should not have this much  
“looseness” in the  
adjustment of the seat belt.**

**Notice the white-tag at the  
end of  
The belt. It shows there  
has been Little or no  
adjustment.**
